

**(ISC)2 Quantico Chapter Members & Security Professionals,**

Thank you for attending this year’s meetings and continuing to support our chapter.

Each year, we try to present a dynamic slate of Security Professional Speakers to teach and inform or members. Last year, some of the Topics presented included:

Cognitive Security: The Third Layer of Cybersecurity –Cyber Persona <b>June 2020</b>	FIDO2 -The Future of Strong Authentication <b>May 2020</b>
Internet Safety: Liars and Phishers and Bad Actors, Oh My! <b>Aug 2020</b>	August 2020 When Time Matters - The Case for Security Automation <b>July 2020</b>
What’s New in NIST SP 800-53, Revision 5: Security & Privacy Controls for Systems & Organizations <b>Oct 2020</b>	Making the Cyber World a Safer Place for Everyone <b>Sept 2020</b>

The **(ISC)2 Quantico Chapter** continues to grow. This year we have automated much of what we do. We are now temporarily conducting all our meetings online with **Microsoft 365 Teams**. We have started Online Event Registration with **Eventbrite.com**. We would like to do more: relaunching our sponsorship program, promoting a scholarship, sharing job opportunities, and giving to **The Center for Cyber Safety and Education**. We need your continued help and support.

The **(ISC)2 Quantico Chapter** does not send individual annual dues reminders for our Chapter Members. We send this letter out twice a year to all members and subscribers. If you are a recent online visitor and like what we do, we encourage you to join our chapter.

If you are a current member or past member, please renew your Membership near your Annual due date. Visit our website at <https://www.isc2quanticochapter.org/> Scroll down to **Become a Member Section** to pay by **PayPal**, securely online.

Also, you can request your Annual due date, update your information, download the **Membership Application**, and send requests to [membership@isc2quanticochapter.org](mailto:membership@isc2quanticochapter.org)

We sincerely hope you will join/renew your membership for 2021. We would like to grow and build on our previous successes. We believe there is a greater need for Cyber Security Professional Development in our region more than ever before.

Thank you,

Best Regards,  
**Joseph Irr CISSP**
